

- what do I want to learn or understand better?
 - I still need to find out the difference between having Scrum's incremental improvements and having sequential tasks, as sequential tasks are discouraged while incremental updates are encouraged. I will ask our supervisor on Monday. Furthermore I want to improve my leading and planning skills as the SM. Currently there is an argument to be made that we have too little planning (hindered by schedule conflicts, currently only 2 instances a week when everyone is available).
- how can I help someone else, or the entire team, to learn something new?
 - By planning meetings where information and knowledge can be exchanged.
- what is my contribution towards the team's use of Scrum?
 - I share my knowledge and try to cooperate when there's something we don't understand. Furthermore I help plan and lead meetings.
- what is my contribution towards the team's deliveries?
 - MVP: I made the data box which displays the data base. Furthermore I completed the search function as well as formatted and separated the mentioned code into their own components.
 - Team Reflection: I prepared and led the meeting where we had our team reflection as well as documented much of what was said. Furthermore I pushed the content to the repository I guess.
