

What do I want to learn or understand better?

I want to get better at writing user stories, especially making them more vertical. I also want to learn about how to make a website more user friendly and the different ways of making a website responsive.

How can I help someone else, or the entire team, to learn something new?

By sharing material or ideas that I have found useful for the project. If something is unclear I will try to explain to the best of my ability.

What is my contribution towards the team's application of scrum?

I attended the weekly supervision meeting and also the team meeting where we discussed and wrote new user stories for the upcoming sprint to keep the scrum board up-to-date.

What is my contribution towards the team's deliveries?

This week, I have worked on adding CSS to the website. The navigation bar was remade to be more responsive and an “about” and “donate” page was added. When clicking on “about” or “donate” for example, the user will now be taken to these pages. In the donate page, a donate button has been implemented which takes the user to an organization's website. A website logo was also added. I have also helped write user stories.
