what do I want to learn or understand better?

I still feel like my knowledge in programming in HTML, javascript, and CSS is lacking. Therefore, improving in that department is essential if I want to keep up with the tempo moving forward.

how can I help someone else, or the entire team, to learn something new?

With pair programming, I have a reliable way of being of assistance to my programming partner. But since most of our work is done remotely, it is rather difficult to assist team members if they don't ask for help. One thing I can do, however, is sharing useful material which I think others might find helpful.

what is my contribution towards the team's use of Scrum?

I have participated in all of our scheduled events which include writing user stories and doing sprint reviews. I also, together with Malte, used the discord chat to communicate our daily progress with the rest of the team.

what is my contribution towards the team's deliveries?

I have, together with Malte, worked on implementing the database which we finished.
