What do I want to learn or understand better?
I want to learn more about react and javascript for implementing a website as well as HTML and CSS since it is all new to me.

How can I help someone else, or the entire team, to learn something new?
By frequently communicating and informing the team in good time for problems that affect the project moving forward, so we can solve and learn from them together. I can also help by sharing material that can be of use.

What is my contribution towards the team's application of scrum?
Writing user stories, informing the team when an implementation has been made or if help is needed, attending scheduled meetings.

What is my contribution towards the team's deliveries?
Jakob and I worked on the HTML part and added components for the website. I also helped write the team reflection.
