- what do I want to learn or understand better?
  - I want to improve on constructing vertical slices. Furthermore I need to find out the difference between having Scrum's incremental improvements and having sequential tasks, as sequential tasks are discouraged while incremental updates are encouraged.
- how can I help someone else, or the entire team, to learn something new?
  - By sharing knowledge about React out of planned working times, and cooperating on learning Scrum on planned working times.
- what is my contribution towards the team's use of Scrum?
  - I share my knowledge and try to cooperate when there's something we don't understand, for instance when we made our project scope and realized together with Johan that we were focusing too much on the product scope.
- what is my contribution towards the team's deliveries?
  - I helped write a lot of the project scope with Johan and Aziz. Furthermore, I made the design mockup of the website.
